

AUSTRIAN DDGS

6MM PELLET

Co-Product from the production of bio-ethanol. The whole grains are milled to reduce its particle size and provide the substrate for the fermentation process. The ethanol is distilled out of the mixture, the remaining grain residue is mixed with some liquid fraction, and slowly and carefully dried. When stored cool and dry (max. 75% relative humidity) at least 12 months.

Delivery form: Bulk in pellets.

Shipment: Via bulk vessel or container (both bulk and bulk bags).
