

HUNGARIAN DDGS

PANNONIA GOLD MEAL

TYPICAL ANALYSIS

Moisture	10-12%
Crude Protein	28-30%
Crude Fat	9-10%
Crude Fibre	10%
Crude Ash	4-6%
Starch	3%
Sodium	Max 3g/kg
NDF	33.5%
Lysine	0.7-2.0%
Methionine	0.3-1.5%
Phosphorus	1-10g/kg
Calcium	0-1.0g/kg
Magnesium	2.5-5.0g/kg

Co-Product from the production of bio-ethanol. Whole corn is milled to reduce its particle size and provide the substrate for the fermentation process. The ethanol is distilled out of the mixture, the remaining grain residue is mixed with some liquid fraction, and slowly and carefully dried. When stored cool and dry (max. 75% relative humidity) at least 12 months.

Delivery form: Bulk in meal.

Shipment: Via bulk vessel or container (both bulk and bulk bags).
